

This is FFI

Strategic Vehicle Research and Innovation (FFI) is a public-private partnership between the government and the automotive industry. FFI has been funding road traffic research and innovation for a sustainable society since 2009. Through FFI, knowledge has been built up in industry, higher education institutions and research institutes. Solutions developed within the collaboration have been implemented and welcomed by both users and society.

Vision

Sweden leads the global transition to sustainable road transport.

Mission

FFI empowers road transport research and innovation for a sustainable society.

Our five sub-programmes

Circularity

Circularity with the focus on minimising the climate and environmental impact of manufacturing, service and decommissioning vehicles.

Safe Automated Driving

Safe Automated Driving with the focus on increasing road safety and making transportation more sustainable through safe, connected, automated vehicles prepared for next-generation transport systems.

Transport & Mobility Services

Transport and Mobility Services with the focus on efficient transport and mobility solutions that meet society's sustainability, accessibility and resilience challenges.

Zero Emissions

Zero Emissions with the focus on reducing the negative climate and environmental impact of vehicles in the use phase, in combination with user behaviour and charging and refuelling infrastructure.

Accelerate

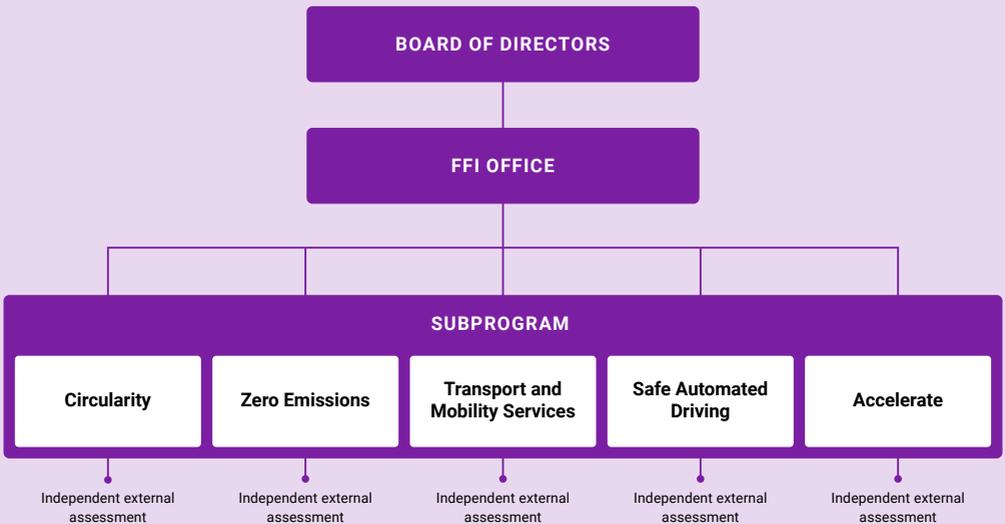

Accelerate with the focus on accelerating transition through systems demonstrations, upscaling and demand-driven projects in which all dimensions of systems are addressed: new technology, regulations, infrastructure, business models and behaviour.

Agreement between the automotive industry and the government

The board of FFI consists of members from both governmental agencies and the automotive industry:

- Vinnova, Sweden's innovation agency
- Trafikverket, The Swedish Transport Administration
- Energimyndigheten, The Swedish Energy Agency
- Scania CV AB
- AB Volvo
- Volvo Car Group
- FKG, the industry organisation for Scandinavian suppliers to the automotive industry

The FFI is steered by a board of directors, a joint FFI office at Vinnova and a program council for each subprogram.

Each program has two calls for proposals each year.
